

**ZOLLER**  
expect great measures

## ZOLLER NEWS

It's official – spring is here! But are you taking full advantage of the 'season of growth' or is it maybe time for some 'spring cleaning'? Right now is the perfect time to get organized and **streamline your manufacturing process** even more. How? That's easy – whether you need to **incorporate a new tool presetter** into your production, **upgrade your existing unit**, add **tool management** into the flow or simply want to schedule your **yearly maintenance** – we can be of assistance with any of those tasks, just contact us!

### CASE STUDY Tool presetter helps boost accuracy and productivity

In search of equipment that would both streamline the current workload of John R. Bromiley Machine Co. Inc., a job shop in Chalfont, PA, and handle the added rigors of aerospace machining, VP Jason Bromiley quickly determined that a ZOLLER »smile/pilot 3.0« tool presetter and measuring machine was the way to go. "I wanted something to help with the setups," said Bromiley. In addition to minimizing setup time, presetters ensure consistent, accurate tool measurements. The potential time and cost savings are numerous – from extended tool life to increased productivity and reduced machine downtime.

With the ZOLLER »smile 400/pilot 3.0« presetter in the background, Jason Bromiley (VP, left), and Steve Atlee, toolroom attendant, discuss tooling

Incorporating the technology, was seamless, Bromiley said. And adds: "My milling supervisors endorse the tool presetter's working capability. When they punch in the number my toolcrib attendant provides on the tool, it's dead nuts every time." [>Read more](#)

*Product safety comes first*

### ZOLLER tool presetter and measuring machines certified with the DEKRA seal

We have committed ourselves to offering state-of-the-art technology, highest precision and quality. In addition to a continuous development of its products, ZOLLER has also always focused on documenting this superior quality. Aside from our certifications according to DIN EN ISO 9001 and DIN EN ISO 14001, the ZOLLER tool presetter and measuring machine product line has now been awarded the DEKRA seal for product safety, providing additional confidence in our products.

### SPRING AWAKENING

GrindTec 2010 (Augsburg, Germany) surpassed everybody's expectations – including ZOLLER Germany!

### PREVENTATIVE MAINTENANCE

Scheduled maintenance significantly decreases your overall service costs while maximizing your machine's performance. See for yourself how [our various preventative maintenance contracts](#) offer the perfect coverage for your specific needs – ensuring continuous outstanding service beyond the machine's warranty period. ### UPGRADE OPTIONS

Take advantage of our [current offers](#) and upgrade your existing ZOLLER tool presetter to the latest 'state-of-the-art' technology

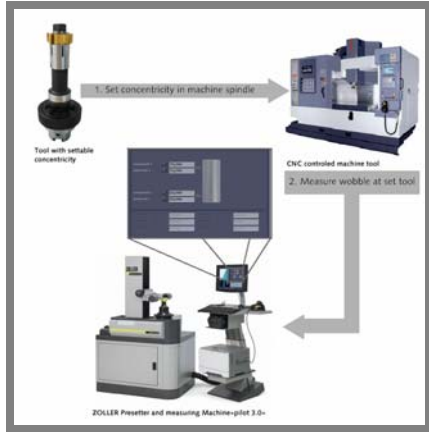

DEKRA is an internationally focused expert organization providing competent and innovative services in the fields of vehicle testing, expert appraisals, industrial services, certification, environmental and building monitoring.

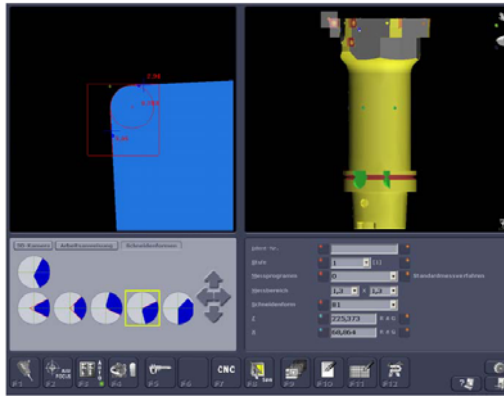

## PRODUCT NEWS

### Machine concentricity compensation

One of the latest developments with ZOLLER's »**pilot 3.0**« **software** is the machine concentricity compensation function. The machine's spindle run-out is being compensated in the presetter by **measuring its effective wobble** and then applying it to all future tool measurements. [>Read more](#)

### »CAZ« The virtual measuring machine

Just like a virtual measuring machine, the **ZOLLER software »CAZ«** (**computer-aided-ZOLLER**) enables the setup of measuring sequences based on the 3D drawing of a tool. A tool's measuring points, nominal values, cutting shapes and measuring programs can already be defined during the CAD design stage of the tool. [>Read more](#)

## THANK YOU!

Thank you for your continued support of ZOLLER products, and if you have any questions or would like additional information regarding how ZOLLER is working for you, please contact us.

Best regards,  
Your ZOLLER Team

## UPCOMING EVENTS

### [Micro Manufacturing Conference](#)

**Booth 704**  
April 14, 2010  
Mesa (Phoenix), AZ  
USA

### [PDx/amerimold](#)

**Booth: 922**  
May 11-13, 2010  
Cincinnati, OH
